PROJECT OVERVIEW

The Nizi–Baluma project offers an opportunity to reprocess historical gold tailings, with additional longer-term potential in the wider Nizi–Mont Baluma project area.

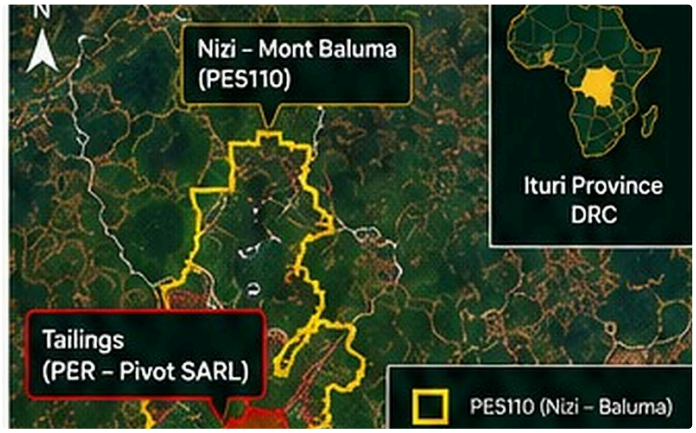

The tailings, held under a separate PER, are estimated at approximately 1.31 million tonnes (Phase 1B studies) with an average grade of 1.87 g/t Au.

A 500 t/day CIP processing plant is proposed. The project provides an opportunity for environmental improvement and future development of the underlying mineralised ground (via BALUMA SA, PE5110).

KEY HIGHLIGHTS

- Approximately 1.31 Mt of historical tailings (Phase 1B)
- Average grade 1.87 g/t Au
- 500 t/day CIP processing plant proposed
- Ownership arrangements proposed, subject to agreement
- Environmental benefits through rehabilitation and responsible reprocessing

PROJECT LOCATION

Illustrative location map

TAILINGS SITE (EXAMPLE)

- Historical gold tailings from previous operations.
- Potential for reprocessing using CIP.

PROPOSED PROCESSING PLANT (500 T/DAY)

- CIP plant concept (mid-tier design).
- Metallurgical test work to confirm recovery.

WIDER PROJECT POTENTIAL

- Nizi–Mont Baluma project (BALUMA SA, PE5110).
- Opportunity for further exploration and development.

NEXT STEPS

1. **Finalise agreements**
2. **Feasibility studies**
3. **Permitting and financing**
4. **Plant construction and mobilisation**
5. **Commissioning and ramp-up**

PARTNERSHIP OPPORTUNITY

Nizi–Baluma combines tailings reprocessing with longer-term exploration upside. We welcome discussions with strategic partners.
