PROJECT BRIEF · CONFIDENTIAL

Pumba Copper & Gold

PR15201 | Haut-Katanga Province, DRC

A copper and gold exploration project within the mineral-rich Kundelungu formation, with strong IP anomalies and multiple drill targets.

COPPER | GOLD | SULPHIDES | OXIDES | STRONG IP ANOMALIES

PROJECT OVERVIEW

Pumba (PR15201) is a copper and gold project located in the Haut-Katanga Province of the Democratic Republic of the Congo, within the Kundelungu formation.

Historic work and recent exploration indicate strong IP anomalies with targets from surface to depth. The project offers potential for oxide, mixed and sulphide mineralisation with both copper and gold upside.

Guilgal International is working with local partners to advance exploration, including detailed geophysical interpretation, target generation and a phased drilling programme.

KEY HIGHLIGHTS

- Exploration licence PR15201 secured
- Located in the mineral-rich Kundelungu formation
- Strong IP geophysical anomalies
- Multiple priority drill targets (BW01 to BW10)
- Copper and gold potential (oxide to sulphide)
- Access to experienced drilling team and regional support

PROJECT LOCATION

Illustrative location map

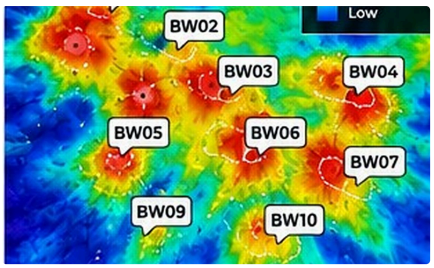

REGIONAL GEOLOGY

Outcropping Kundelungu sediments within the project area

- Located within the Kundelungu formation, a major Central African Copperbelt analogue.
- Favourable stratigraphy for sediment-hosted copper with gold potential.
- Evidence of oxide, mixed and sulphide mineralisation.
- Regional setting with multiple high-priority targets.

IP GEOPHYSICS: CHARGEABILITY

IP chargeability image showing key target zones (BW01 to BW10)

PROPOSED DRILL TARGETS (GEDEON)

Target	Depth range (m)	Comment
BW01	0 to 200	Priority target
BW02	70 to 200	Strong anomaly
BW03	100 to 200	Key target
BW04	100 to 150	Shallow target
BW05	70 to 200	Strong anomaly
BW06	100 to 150	Key target
BW07	90 to 100	Shallow target
BW09	90 to 200	Priority target
BW10	90 to 200	Priority target

Drilling to test IP anomalies and define copper and gold mineralisation from surface to depth.

EXPLORATION PROGRAMME

1. **Site visit and detailed geological review**
   Confirm targets and refine drill programme.
2. **Complete geophysical interpretation**
   Integrate IP data and generate drill targets.
3. **Phase 1 drilling programme**
   Test priority targets (BW01 to BW10).
4. **Ongoing exploration and evaluation**
   Follow-up drilling and broader project assessment.

INDICATIVE TIMELINE

Q4 2026	Site visit and target review
Q1 2027	Commence drilling
Q2 2027	Assays and initial results
Q3 to Q4 2027	Follow-up drilling
2028+	Resource definition

Timeline is indicative and subject to funding, access, seasonal conditions and regulatory approvals.

PARTNERSHIP OPPORTUNITY

Pumba is a copper and gold exploration project in a proven mineral province. We welcome discussions with investors, joint-venture partners and mining companies to advance exploration and development.
