PROJECT BRIEF · CONFIDENTIAL

Ndela–Mpaza

PR15621 & PR15648 | Kweneng, DRC

Prospective for rare earth elements, critical minerals and pegmatites with strong radiometric signatures.

RARE EARTH ELEMENTS | LITHIUM | CRITICAL MINERALS | PEGMATITES

RARE EARTH ELEMENTS
Strong K, U, Th radiometric signatures

PR15621 & PR15648
Kweneng, DRC

PEGMATITES
Highly prospective granitic terrains

CRITICAL MINERALS
Lithium, REEs and associated elements

TARGET GENERATION
Radiometrics, mapping and drilling programme

PROJECT OVERVIEW

Ndela and Mpaza (PR15621 and PR15648) are located in the Kweneng region of the Democratic Republic of the Congo, within prospective granitic terrains known to host pegmatites and critical minerals.

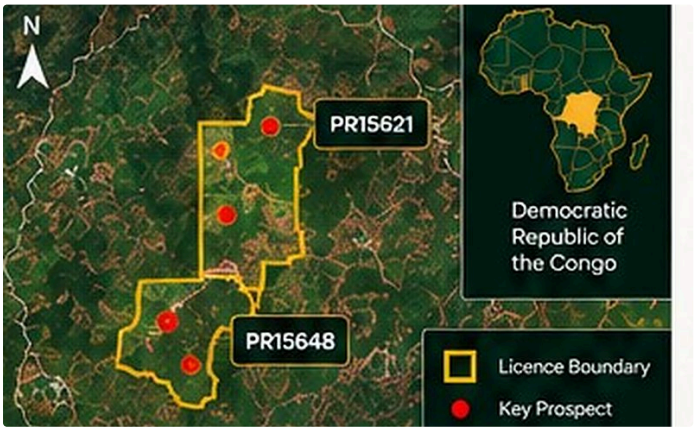

Radiometric surveys indicate strong signatures for potassium (K), uranium (U) and thorium (Th), which can be associated with rare earth elements (REEs), lithium and other critical minerals.

Guilgal International is working with local partners to advance exploration, including detailed mapping, radiometric surveys, target generation and a phased drilling programme.

KEY HIGHLIGHTS

- Two exploration licences (PR15621 & PR15648)
- Strong radiometric signatures (K, U, Th)
- Pegmatite targets with REE and lithium potential
- Systematic target generation and drill testing
- Support from experienced local partners and regional exploration teams

PROJECT LOCATION

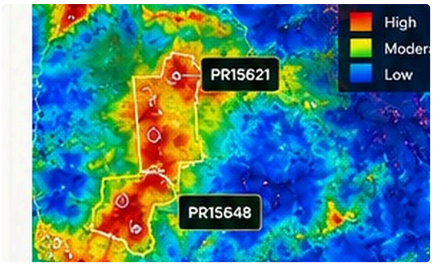

Illustrative location map

REGIONAL GEOLOGY

- Located within the Kweneng granitic complex.
- Pegmatites and associated rare earth element mineralisation.
- Favourable structural setting for critical minerals.
- Accessible by existing regional infrastructure.

RADIOMETRIC SURVEY (EXAMPLE)

Radiometric image showing elevated K, U, Th signatures (illustrative example)

TARGET GENERATION

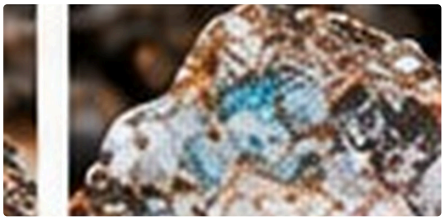

- Radiometric interpretation to identify priority zones.
- Detailed geological mapping and sampling.
- Multiple pegmatite targets defined.

Rare earth elements

Lithium minerals

EXPLORATION PROGRAMME

1. **Site visit and detailed mapping**
   Confirm access, geology and targets.
2. **Geophysical surveys**
   Radiometrics and interpretation.
3. **Target generation**
   Define priority drill targets.
4. **Diamond drilling programme**
   Test key targets.
5. **Evaluation and development**
   Follow-up drilling and project assessment.

PARTNERSHIP OPPORTUNITY

Ndela–Mpaza is an early-stage project with exposure to high-demand critical minerals. We welcome strategic partners and investors.
